Press Release

Notice of Fuels Reduction:

Forest Ranch - Doe Mill Ridge Mastication and Hand Piling Project- Phase II

To enhance public safety and reduce hazardous fuels in Forest Ranch, the Butte County Fire Safe Council (BCFSC), in collaboration with Cal Fire and California Climate Investments (CCI), will continue to carry out fuel reduction through mastication, hand cutting, and hand piling. These efforts aim to decrease dense vegetation, restore forest health, and improve watershed resilience, ultimately supporting the long-term goal of prescribed fire.

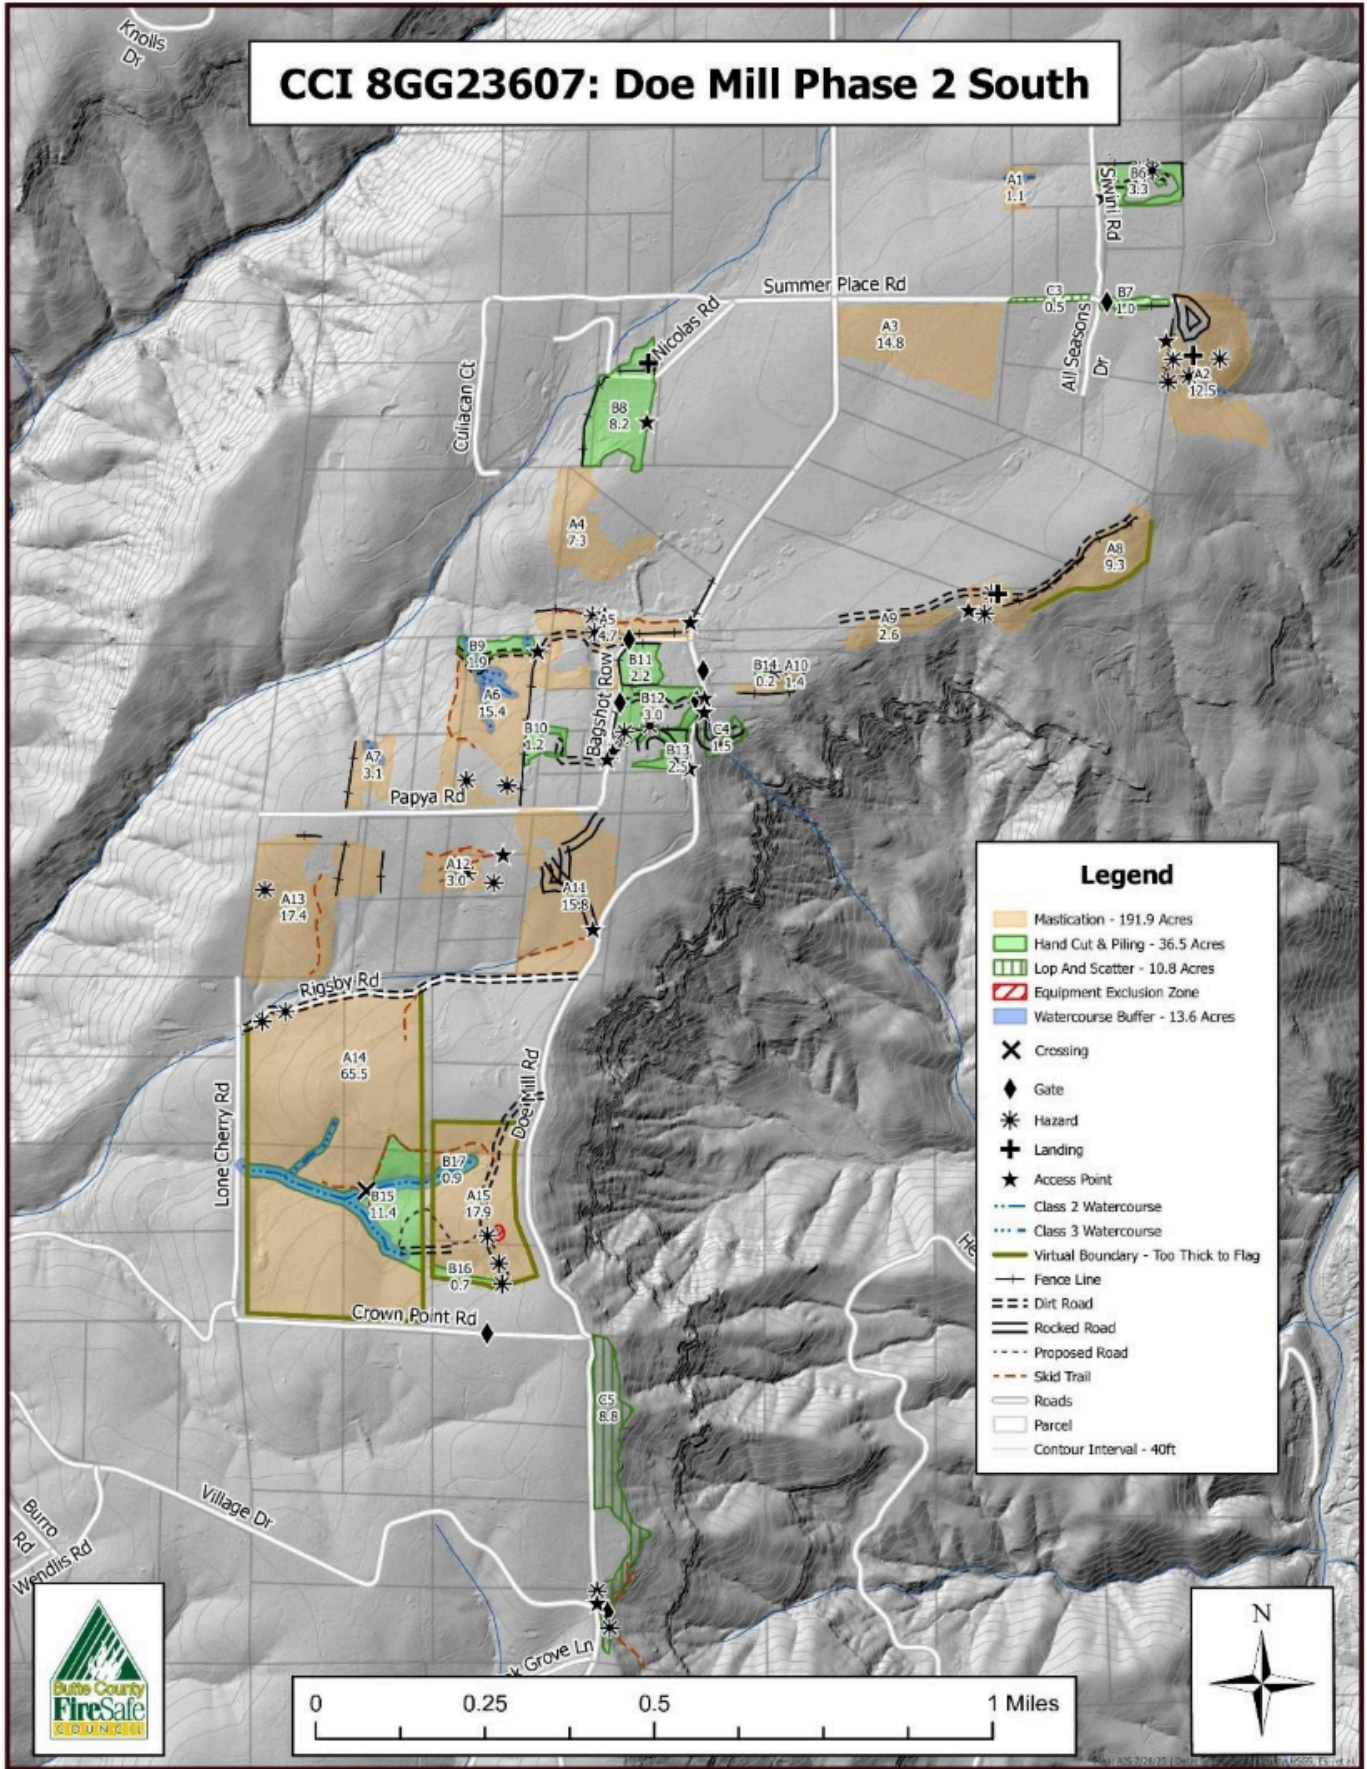

The project is strategically located along Doe Mill Road, spanning 260 acres of treatment. The location is part of a greater effort to connect previously completed and upcoming projects to provide overall community safety. Understory vegetation will be reduced through mechanical mastication to establish a fuel break for the community. Additionally, hand cut and pile units will be strategically placed to ensure the fuel load is effectively reduced through planned prescribed fire. Work is scheduled to begin in the middle of September and will continue until the project is completed.

The Butte County Fire Safe Council is a grassroots non-profit organization that implements a variety of fuels reduction and forest health projects in operation around Butte County including Forbestown, Berry Creek, Forest Ranch, Cohasset, Paradise, Big Chico Creek Canyon, and Oroville Foothills. More information can be found on BCFSC's website <https://buttefiresafe.net/>, Facebook or by calling our office at (530) 877-0984.

"Funding for Forest Knolls Mastication Project was provided by CAL FIRE's Forest Health Program, as part of California Climate Investments. California Climate Investments, a statewide program that puts billions of Cap-and-Trade dollars to work reducing GHG emissions, strengthening the economy, and improving public health and the environment—particularly in disadvantaged communities. The Cap-and-Trade program also creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution. California Climate Investments projects include affordable housing, renewable energy, public transportation, zero-emission vehicles, environmental restoration, more sustainable agriculture, recycling, and much more. At least 35 percent of these investments are located within and benefiting residents of disadvantaged communities, low-income communities, and low-income households across California. For more information, visit the California Climate Investments website at: www.caclimateinvestments.ca.gov."
